The "Five I's" of Sexual Assault

- **INVASION:** Perpetrators often invade personal space visually, verbally, and physically. Such behavior is designed to make another uncomfortable.
- **IGNORING:** Perpetrators often ignore verbal and non-verbal communication.
- **ISOLATION:** Perpetrators are often creative and subtle in their attempts to get someone alone.
- **INTOXICATION:** Perpetrators often use alcohol and drugs to make someone vulnerable. Alcohol and drugs are a factor in as many as 90% of sexual assaults.
- **INSTINCTS:** Perpetrators rely on people dismissing or denying their instincts. Perpetrators use the fact that they know someone to gain access.
